Keyword index

A

all-trans retinoic acid — All-trans retinoic acid (ATRA) therapeutical effect in acute promyelocytic leukemia, 201

allograft — Current problems in organ transplantation, 53

amyloid-ß peptide — T-lymphocyte control of HLA-DR blood monocyte differentiation into neo-fibroblasts. Further evidence of pluripotential secreting functions of HLA-DR monocytes, involving not only collagen but also uromodulin, amyloid-ß peptide, α-fetoprotein and carcinoembryonic antigen, 91

anti-AIDS vaccine — Immunogenicity of combined anti-HIV and anti-depressive vaccine preparations, 149 — Removal of GP160 induced bio-hazards for a safe AIDS vaccine candidate, 353 — Cell-mediated immunity against HGP-30, a group-specific peptide of HIV p17 in individuals infected with the AIDS virus, 359

anti-CD4 antibody — Removal of GP160 induced bio-hazards for a safe AIDS vaccine candidate, 353

Automat (software) — Critical sites: a semantic approach to protein sequences. Application to the HIV-1 envelope molecule, 343

B

benzodiazepine — Bromezan-induced dystonia, 375

bilestones — Non-surgical management of bile duct stones, 143

biogenesis — Innate chaos: I. The origin and genesis of complex morphologies and homeotic regulation, 219

bone alkaline phosphatase — Serum bone alkaline phosphatase and CA 549 in breast cancer with bone metastases, 31

bone marrow — Current status of allogeneic bone marrow transplantation, 57

bone marrow cell — Effect of enkephalins on bone marrow cells, 367

bone metastase — Serum bone alkaline phosphatase and CA 549 in breast cancer with bone metastases, 31

breast cancer — Serum bone alkaline phosphatase and CA 549 in breast cancer with bone metastases, 31

Bromazepan — Bromezan-induced dystonia, 375

brucellosis — Displacement of rifampcin bound to serum proteins by addition of levamisole, 173

burn injury — Nitric oxide mediates the depression of lymphoproliferative responses following burn injury in rats, 495

C

calcium-channel antagonist — Effect of pinaverium bromide on jejunal motility and colonic transit time in healthy humans, 161

cancer — Retrospective study correlating clinical infectious history and peripheral blood T-cell subpopulations in cancer, GvH and HIV+ patients, 17

carcinoma — Chemotherapy of advanced epithelial cancer - a critical review, 439

chaos — Innate chaos: I. The origin and genesis of complex morphologies and homeotic regulation, 219

chemical mediator — Innate chaos: I. The origin and genesis of complex morphologies and homeotic regulation, 219

chemotherapy — Chemotherapy of advanced epithelial

cancer - a critical review, 439

colon — Endoscopic ultrasonography in colorectal diseases, 133 — Effect of pinaverium bromide on jejunal motility and colonic transit time in healthy humans, 161

combination cytotoxic-differentiation therapy — Enhancement of differentiation and cytotoxicity of leukemia cells by combinations of fluorinated pyrimidines and differentiation inducers: development of DNA double-strand breaks, 183

computer-assisted analysis — Critical sites: a semantic approach to protein sequences. Application to the HIV-1 envelope molecule, 343

cord blood — Serum granulocyte colony-stimulating factor levels in umbilical cord blood of normal full-term neonates, 337

Critic (software) — Critical sites: a semantic approach to protein sequences. Application to the HIV-1 envelope molecule, 343

cytomegalovirus — Acute hepatitis in childhood: virological, immunological and clinical aspects, 155

cytosine arabinoside — Therapy of `high risk' myelodysplastic syndromes with an association of low-dose 1ra-C, retinoic acid and 1,23-dihydroxyvitamin D3, 211

D

differentiation — T-lymphocyte control of HLA-DR blood monocyte differentiation into neo-fibroblasts. Further evidence of pluripotential secreting functions of HLA-DR monocytes, involving not only collagen but also uromodulin, amyloid-ß peptide, α-fetoprotein and carcinoembryonic antigen, 91

differentiation inhibiting factor — Identity of differentiation inhibiting factor for mouse myeloid leukemia cells with Nm23/nucleoside diphosphate kinase, 193

differentiation therapy — 5th International Congress on Differentiation Therapy (Villasimius, Sardinia, Italy, September 1992), 181-336

DNA break — Enhancement of differentiation and cytotoxicity of leukemia cells by combinations of fluorinated pyrimidines and differentiation inducers: development of DNA double-strand breaks, 183

drug-induced dystonia — Bromezan-induced dystonia, 375

E

ELISA — Serum granulocyte colony-stimulating factor levels in umbilical cord blood of normal full-term neonates, 337

endoscopic ultrasonography — Endoscopic ultrasonography in colorectal diseases, 133

enhancing antibody — Removal of GP160 induced biohazards for a safe AIDS vaccine candidate, 353

enkephalin — Effect of enkephalins on bone marrow cells, 367

erythropoietin — Serum erythropoietin levels in hemodialysed patients after administration of recombinant human erythropoietin, 37

Epstein-Barr virus — Acute hepatitis in childhood: virological, immunological and clinical aspects, 155

F

5-fluorouracil — Enhancement of differentiation and cytotoxicity of leukemia cells by combinations of fluorinated pyrimidines and differentiation inducers: development of DNA double-strand breaks, 183

FUra — Enhancement of differentiation and cytotoxicity of leukemia cells by combinations of fluorinated pyrimidines and differentiation inducers: development of DNA double-strand breaks, 183

G

G-CSF — Serum granulocyte colony-stimulating factor levels in umbilical cord blood of normal full-term neonates, 337

Graves ophtalmopathy — TSH binding site structures in human eye muscle fractions identified by using covalent-crosslinking, 121

GvH — Retrospective study correlating clinical infectious history and peripheral blood T-cell subpopulations in cancer, GvH and HIV+ patients, 17

H

H2 restriction — Allogenic recognition in 1992, 85

hepatitis B virus — Acute hepatitis in childhood: virological, immunological and clinical aspects, 155

hepatotoxicity — Hepatotoxicity induced by a single ip injection of ruthenium red, 115

HGP-30 — Cell-mediated immunity against HGP-30, a group-specific peptide of HIV p17 in individuals infected with the AIDS virus, 359

high performance liquid chromatography — Levels and variability of purine nucleotids in normal human lymphocytes, 109

HIV — Systemic hyperthermia in the treatment of HIV-related Kaposi's sarcoma. A phase I study, 21

HIV p17 — Cell-mediated immunity against HGP-30, a group-specific peptide of HIV p17 in individuals infected with the AIDS virus, 359

HIV patients — Retrospective study correlating clinical infectious history and peripheral blood T-cell subpopulations in cancer, GvH and HIV+ patients, 17 — Analysis of purine nucleotides in lymphocytes from healthy subjects and AIDS patients, 25

HIV-1 Env gp160 protein — Removal of GP160 induced bio-hazards for a safe AIDS vaccine candidate, 353

HIV-1 envelope molecule — Critical sites: a semantic approach to protein sequences. Application to the HIV-1 envelope molecule, 343

HIV-1 peptide — Immunogenicity of combined anti-HIV and anti-depressive vaccine preparations, 149

HIV-1 vaccine — Immunogenicity of combined anti-HIV and anti-depressive vaccine preparations, 149 — Removal of GP160 induced bio-hazards for a safe AIDS vaccine candidate, 353 — Cell-mediated immunity against HGP-30, a group-specific peptide of HIV p17 in individuals infected with the AIDS virus, 359

HL-60 cell — Enhancement of differentiation and cytotoxicity of leukemia cells by combinations of fluorinated pyrimidines and differentiation inducers: development of DNA double-strand breaks, 183

HLA-DR neo-fibroblasts — T-lymphocyte control of HLA-DR blood monocyte differentiation into neo-fibroblasts. Further evidence of pluripotential secreting functions of HLA-DR monocytes, involving not only collagen but also uromodulin, amyloid-ß peptide, α-fetoprotein and carcinoembryonic antigen, 91

HMBA — Enhancement of differentiation and cytotoxicity of leukemia cells by combinations of fluorinated pyrimidines and differentiation inducers: development of DNA double-strand breaks, 183

homeosis — Innate chaos: I. The origin and genesis of complex morphologies and homeotic regulation, 219

human eye muscle — TSH binding site structures in human eye muscle fractions identified by using covalent-crosslinking, 121

hyperthermia — Systemic hyperthermia in the treatment of HIV-related Kaposi's sarcoma. A phase I study, 21

I

immunomodulator — Anti-infectious effect of C Granulosum-derived P40 immunomodulator given by aerosolization and intranasal instillation, 491

immunosuppression — Immunogenicity of combined anti-HIV and anti-depressive vaccine preparations, 149 — Current problems in organ transplantation, 53 — Nitric oxide mediates the depression of lymphoproliferative responses following burn injury in rats, 495

immunotherapy — Current status of Interleukin-2 therapy in cancer, 473

influenza — Anti-infectious effect of C Granulosum-derived P40 immunomodulator given by aerosolization and intranasal instillation, 491

inosine — Inosine-containing primers in human papillomavirus detection by polymerase chain reaction, 169

interleukin — Current status of Interleukin-2 therapy in cancer, 473

intracranial hypertension — Minocycline and benign intracranial hypertension, 171

islet — Pancreas and islet cell transplantation in man, 71

J

jejunum — Effect of pinaverium bromide on jejunal motility and colonic transit time in healthy humans, 161

K

K pneumoniae infection — Anti-infectious effect of C Granulosum-derived P40 immunomodulator given by aerosolization and intranasal instillation, 491

Kaposi's sarcoma — Systemic hyperthermia in the treat-

ment of HIV-related Kaposi's sarcoma. A phase I study, 21

L

leucovorin — Enhancement of differentiation and cytotoxicity of leukemia cells by combinations of fluorinated pyrimidines and differentiation inducers: development of DNA double-strand breaks, 183

levamisole — Displacement of rifampcin bound to serum proteins by addition of levamisole, 173

LH-RH analog — Present status of agonistic and antagonistic analogs of LH-RH in the treatment of advanced prostatic cancer, 465

liver — Liver transplantation: the challenges of the 1990s, 79

lymphocyte — Analysis of purine nucleotides in lymphocytes from healthy subjects and AIDS patients, 25

M

major histocompatibility complex (MHC) — Allogenic recognition in 1992, 85

MDR + leukemia cells — Variation of choline-substituted lipid metabolism in doxorubicin-resistant leukemia cells, 485

minocycline — Minocycline and benign intracranial hypertension, 171

MIPS data bank — Critical sites: a semantic approach to protein sequences. Application to the HIV-1 envelope molecule, 343

monoclonal antibody — Management of patients with ovarian cancer using monoclonal antibodies, 453

motility — Effect of pinaverium bromide on jejunal motility and colonic transit time in healthy humans, 161

myelodysplastic syndrome — Therapy of `high risk' myelodysplastic syndromes with an association of low-dose 1ra-C, retinoic acid and 1,23-dihydroxyvitamin D3, 211

myeloid leukemia — Identity of differentiation inhibiting factor for mouse myeloid leukemia cells with Nm23/nucleoside diphosphate kinase, 193

N

nitric oxide — Nitric oxide mediates the depression of lymphoproliferative responses following burn injury in rats, 495

Nm23/nucleoside diphosphate kinase — Identity of differentiation inhibiting factor for mouse myeloid leukemia cells with Nm23/nucleoside diphosphate kinase, 193

non-surgical treatment — Non-surgical management of bile duct stones, 143

O

opportunistic infections — Retrospective study correlating clinical infectious history and peripheral blood T-cell subpopulations in cancer, GvH and HIV+ patients, 17

ovarian tumor — Management of patients with ovarian cancer using monoclonal antibodies, 453

overview — Chemotherapy of advanced epithelial cancer - a critical review, 439

P

papillomavirus — Inosine-containing primers in human papillomavirus detection by polymerase chain reaction, 169

pediatric hepatitis — Acute hepatitis in childhood: virological, immunological and clinical aspects, 155

peptide — Cell-mediated immunity against HGP-30, a group-specific peptide of HIV p17 in individuals infected with the AIDS virus, 359

peripheral blood T-cells — Retrospective study correlating clinical infectious history and peripheral blood T-cell subpopulations in cancer, GvH and HIV+ patients, 17

phosphatidylcholine — Variation of choline-substituted lipid metabolism in doxorubicin-resistant leukemia cells, 485

placenta — Serum granulocyte colony-stimulating factor levels in umbilical cord blood of normal full-term neonates, 337

polymerase chain reaction — Inosine-containing primers in human papillomavirus detection by polymerase chain reaction, 169

proliferation — Effect of enkephalins on bone marrow cells, 367

promyelocytic leukemia — All-trans retinoic acid (ATRA) therapeutical effect in acute promyelocytic leukemia, 201

prostate cancer — Present status of agonistic and antagonistic analogs of LH-RH in the treatment of advanced prostatic cancer, 465

protein sequence — Critical sites: a semantic approach to protein sequences. Application to the HIV-1 envelope molecule, 343

purine nucleotide — Levels and variability of purine nucleotids in normal human lymphocytes, 109

purine nucleotides — Analysis of purine nucleotides in lymphocytes from healthy subjects and AIDS patients, 25

R

radioimmunoscintigraphy — Management of patients with ovarian cancer using monoclonal antibodies, 453

rat — Hepatotoxicity induced by a single ip injection of ruthenium red, 115

recreational drug epidemic — The role of drugs in the origin of AIDS, 3

rectum — Endoscopic ultrasonography in colorectal diseases, 133

rejection — Allogenic recognition in 1992, 85 — Current problems in organ transplantation, 53

renal failure — Serum erythropoietin levels in hemodialysed patients after administration of recombinant human erythropoietin, 37

retinoic acid — Enhancement of differentiation and cytotoxicity of leukemia cells by combinations of fluorinated pyrimidines and differentiation inducers: development of DNA double-strand breaks, 183 — Therapy of `high risk' myelodysplastic syndromes with an association of low-dose 1ra-C, retinoic acid and 1,23-dihydroxyvitamin D3, 211

rHuEpo therapy — Serum erythropoietin levels in hemodialysed patients after administration of recombinant human erythropoietin, 37

rifampsin — Displacement of rifampcin bound to serum proteins by addition of levamisole, 173

ruthenium red — Hepatotoxicity induced by a single ip injection of ruthenium red, 115

S

serum erythropoietin level — Serum erythropoietin levels in hemodialysed patients after administration of recombinant human erythropoietin, 37

sphincteroctomy — Non-surgical management of bile duct stones, 143

sphingomyelin — Variation of choline-substituted lipid metabolism in doxorubicin-resistant leukemia cells, 485

surgical endoscopy — Surgical endoscopy in thoracic surgery, 139

T

T-lymphocyte control — T-lymphocyte control of HLA-DR blood monocyte differentiation into neofibroblasts. Further evidence of pluripotential secreting functions of HLA-DR monocytes, involving not only collagen but also uromodulin, amyloid-ß peptide, α-fetoprotein and carcinoembryonic antigen, 91

2-thiohydantoin — Pancreas and islet cell transplantation in man, 71

thoracic surgery — Surgical endoscopy in thoracic surgery, 139

tolerance — Current problems in organ transplantation, 53

toxicity of recreational and anti-HIV drugs — The role of drugs in the origin of AIDS, 3

transplantation — Current problems in organ transplantation, 53 Current status of allogeneic bone marrow transplantation, 57 — Pancreas and islet cell transplantation in man, 71 — Liver transplantation: the challenges of the 1990s, 79 — Allogenic recognition in 1992, 85

TSH receptor — TSH binding site structures in human eye muscle fractions identified by using covalent-crosslinking, 121

tumor infiltrating lymphocyte — Current status of Interleukin-2 therapy in cancer, 473

V

vitamin D3 — Therapy of `high risk' myelodysplastic syndromes with an association of low-dose 1ra-C, retinoic acid and 1,23-dihydroxyvitamin D3, 211
